

# 2015 Technical Design - Geometric Overlap Project

## Geometric Overlap Project

Students will develop a Geometric Overlap drawing consisting of multiple shapes. Drawing must consist of Squares, Rectangles, Triangles and Circles in an overlapping pattern determined by the student. The more overlapping features the higher the grade. See examples for ideas but make your own.

Start with your 2015 Title Block Drawing and use the entire space if needed. Do not touch the border and make sure the drawing is centered when completed. When finished print your drawing and submit for a grade. Due Monday, November 30, 2015, at the end of class.

## Examples:
