

The Design Process

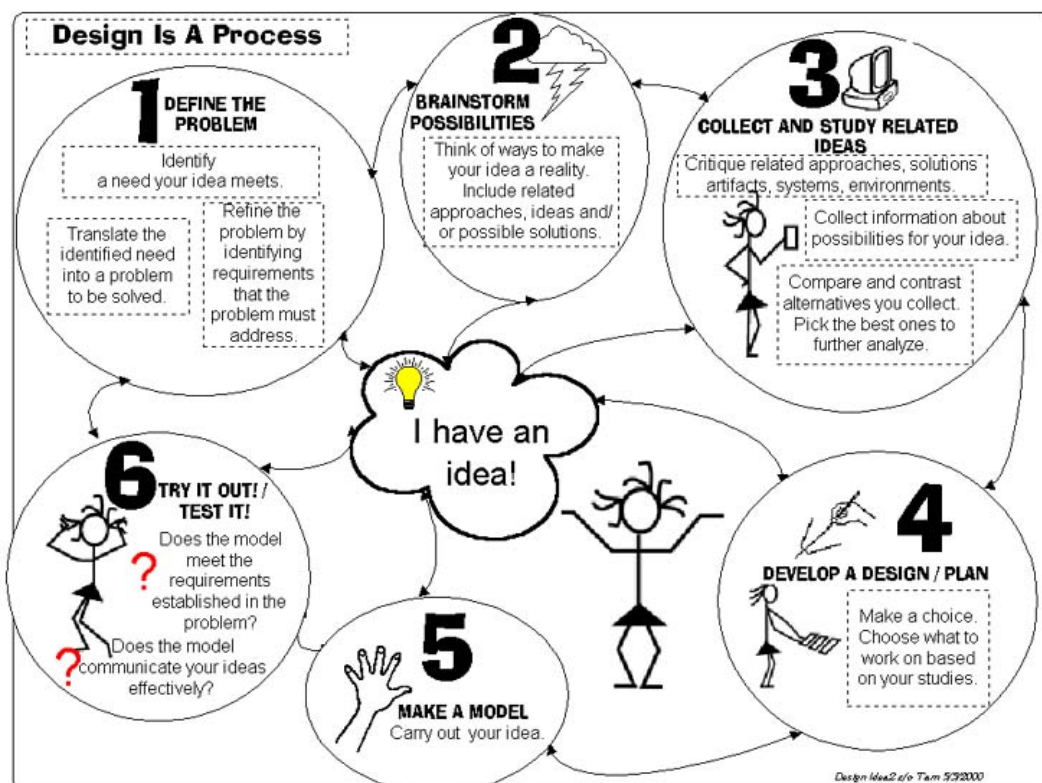

Example #1

Example Design Process

1. Define a Problem
2. Brainstorm
3. Research and Generate Ideas
4. Identify Criteria and Specify Constraints
5. Explore Possibilities
6. Select an Approach
7. Develop a Design Proposal
8. Make a Model or Prototype
9. Test and Evaluate the Design using Specifications
10. Refine the Design
11. Create or Make Solution
12. Communicate Processes and Results

Example #2

The Design Process

Example #3

The Design Process

This is why we research, communicate and ask a lot of questions.....

How the customer explained it

How the Project Leader understood it

How the Business Consultant described it

How the Analyst designed it

How the Programmer wrote it

How the project was documented

What Operations installed

How it performed under load

How it was supported

What marketing advertised

How the customer was billed

What the customer really needed
