CTE Learning that works for Michigan

Amanda Hofmann with her cousin James Arbaugh, a very special mentor in her life.

Work-based learning in CTE takes many forms, but the most relevant and in-depth is on-the-job work experience that builds upon classroom learning. Amanda Hofmann is shown working on a tire in the classroom, and at Russ Milne Ford where she works as an intern under the guidance of Jacob Ernst, Ford Master Technician (shown right with Amanda). After graduation, Amanda will continue to receive support from Russ Milne Ford as she continues her education at Henry Ford College in the Ford ASSET program.

Amanda Hofmann
Outstanding CTE Student!
Automotive Technology, CVHS
Joe Hart, Instructor
