

**Design & Manufacturing
Alliance Conference
Macomb Community
College
April 27, 2010**

Dakota Research and Design students pose near the electric car they have researched, designed and are building as their senior capstone project. Presented at the DMA Conference.

Phil Rairigh (above center) from Ford Motor Company, Sustainable Mobility Technologies, talked with Dakota students Steve Koenke, David Hart, Mitchell Kelps, and Zach Messing about advanced battery and hybrid technologies and the importance of interdisciplinary skills.

Pictured above and below, students get a hands-on look at the hybrid vehicles on display at Macomb Community College.
